Late Projects by Service

Profitability by Service

SLA Performance

DELIVERY

Focus on services with a high number of late projects. Improve project planning, resource allocation, and timeline tracking to reduce delivery delays.

Support

Investigate high SLA-breach categories and priorities. Focus on faster resolution and better ticket assignment to improve support performance.

PROFITABILITY

Prioritize high-profit service areas while reviewing project costs in lower-margin services to improve overall profitability.

WORKFORCE

Monitor employees whose worked hours consistently exceed allocated hours. Balance workload and resource allocation to reduce overutilization.
