PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building end-to-end analytics solutions — from data cleaning and relational database design through SQL analysis, Power BI data modeling, DAX, and interactive dashboard development. Skilled at translating raw, multi-table business data into KPI dashboards and management-ready insights covering profitability, delivery performance, SLA compliance, and workforce productivity, with findings communicated through clear, AI-assisted reporting. Also open to Business Analyst roles involving requirements gathering and stakeholder reporting. Currently pursuing a BCA (expected July 2028), seeking an entry-level Data Analyst role.

TECHNICAL SKILLS

Databases & Query: MySQL, SQL (joins, aggregations, KPI queries), Relational Database Design

BI & Visualization: Power BI (Data Modeling, DAX, Interactive Dashboards), Tableau, Excel Dashboards

Spreadsheet & Reporting: Advanced Excel (VLOOKUP, INDEX-MATCH, Pivot Tables, Data Validation), Stakeholder & Management Reporting

Programming: Python (Pandas, NumPy)

Analysis Methods: Data Cleaning, Data Quality Checks, KPI Development, Profitability Analysis, SLA Analysis, Ad-Hoc Analysis, Requirements Gathering

AI-Assisted Reporting: Using ChatGPT/Copilot to structure analytical findings and support business-focused reporting

Core Strengths: Analytical Thinking, Problem Solving, Attention to Detail, Data Storytelling, Cross-Functional Communication

PRIMARY PROJECT

IT Services Business Performance & Client Analytics Dashboard (*Excel, MySQL, SQL, Power BI, DAX*)

- Built an end-to-end IT services analytics solution across 5 relational tables covering 180 unique clients, 150 employees, 350 projects, and 1,800 support tickets — analyzing profitability, delivery performance, SLA compliance, customer experience, and workforce productivity.
- Designed the relational data model in MySQL and performed data-quality checks: identified 2 duplicate client records (182 rows → 180 unique clients) and classified 4 records with missing Industry values as "Unknown" rather than assuming values.
- Wrote SQL queries (multi-table joins, aggregations, filtering) and Power BI DAX measures to calculate core business KPIs, including total profit (~\$75.9M), profit margin (~32.7%), late projects (149, ~42.6% of total), SLA breach %, average resolution time, and employee hours utilization.
- Built a Power BI data model with relationships across 5 tables and designed a 5-page interactive dashboard (Executive Overview, Project Analytics, IT Support Analytics, Employee Analytics, Management Insights) with KPI cards, slicers, and drillable visuals — using AI-assisted reporting to translate outputs into concise, management-focused insights and recommendations.

Project & SQL scripts: github.com/abdulrehmanshaikhwork/IT-Services-Business-Analytics

PRACTICE PROJECTS

Retail Business Data Cleanup & Analysis (*Excel, Power BI, SQL*)

- Cleaned and standardized a retail dataset of ~20,000 records (duplicates, formatting, missing values) and built a Power BI dashboard with KPI visuals for sales trends, category performance, and regional breakdown.

Sales & Performance Dashboard (*Tableau, Excel*)

- Analyzed sales data to identify top-performing categories and outliers, and built an interactive Tableau dashboard (revenue, order volume, profit margin) with Excel-based data validation checks.

CERTIFICATIONS

- Excel Skills Certification — SkillCourse (edu.skillcourse.in)
- Power BI Skills Certification — SkillCourse (edu.skillcourse.in)

EDUCATION

Bachelor of Computer Applications (BCA)

Vapi, Gujarat, India | Expected Graduation: July 2028

Relevant Coursework: Statistics, Database Management Systems (DBMS), Data Structures, Programming Fundamentals

ADDITIONAL INFORMATION

Open to full-time Data Analyst and Business Analyst roles, with flexibility on work location and schedule.
